BEHAVIORAL MEDICINE

Annual Index, Volume 19 Spring 1993–Winter 1994

TITLES

Behavioral medicine: A retrospective and a look forward. Friedman R, Benson H. Winter:143–144.

Cardiac response of trained and untrained males to a repeated psychological stressor. Boutcher SH, Nugent FW. Spring: 21–27.

Differentiation between major and milder acute mental stress by means of the leukocyte adhesiveness/aggregation test. Shirin H, Pomeranz M, Liberman E, Kedem P, Bartoov M, Arber N, Baruch Y, Arber L, Hirschfeld Z, Pinkhas J, Aronson M, Berliner AS. Winter: 175–180.

Effect of war-induced prolonged stress on cortisol of persons with Type II diabetes melitus. Roglić G, Pibernik-Okanović M, Prašek M, Metelko Z. Summer:53–59.

Effects of psychological stress on cold pressor test results. Grosse A, Prchal A, Diaz Puertas C, Coviello A. Spring:35–41.

Effects of demand and decision latitude on cardiovascular reactivity among coronary-prone women and men. Burns JW, Hutt J, Weidner G. Fall:122–128.

Emotional crying, depressed mood, and secretory immunoglobulin A. Martin RB, Guthrie CA, Pitts CG. Fall:111–114.

An experimental study of the placebo effect in African traditional medicine. Zimba CG, Buggie SE. Fall:103–109.

How maternal characteristics influence differences between mothers' and teachers' ratings of Type A behavior in black preschool children. O'Brien RW, Iannotti RJ. Winter:162–168.

Invasiveness of medical procedures and state anxiety in women. Weller A, Hener T. Summer:60–65.

New directions. Jenkins CD, Kasl SV. Winter:141–142.

Organizational characteristics, perceived work stress, and depression in emergency medicine residents. Revicki DA, Whitley TW, Gallery ME. Summer:74–81.

Personality characteristics of chronic bruxers. Fischer WF, O'toole ET. Summer: 82–86.

Relationship between family environment and children's hemodynamic responses to stress: A longitudinal evaluation. Wright LB, Treiber FA, Davis H, Strong WB, Levy M, VanHuss E, Batchelor C. Fall: 115–121.

Relationships between self-reported symptoms of infection, menstrual-cycle-related distress, and cycle phase. Groër M, Carr J, Younger MS. Spring:13–19.

The relative effectiveness of three reminder letters on making and keeping mammogram appointments. Kendall C, Hailey BJ. Spring:29–24.

Renal hemodynamics and cardiovascular reactivity in the prehypertensive stage. Schmieder RE, Rüddel H, Schächinger H, Bruns J, Schulte W. Spring:5–12.

The relationship between daily stress and urinary cortisol in a normal population: An emphasis on individual differences. Cummins SE, Gevirtz RN. Fall:129–134.

A review of studies comparing checklist and interview methods of data collection in life event research. Gorman DM. Summer:66–73.

The role of state-trait anxiety in insomnia and daytime restedness. Chambers MJ, Kim JY. Spring:42–46.

Serum lipids, neuroendocrine and cardiovascular responses to stress in men and women with mild hypertension. Burker EJ, Fredrikson M, Rifai N, Siegel W, Blumenthal JA. Winter:155–161.

Stressors in patients awaiting a heart transplant. Jalowiec A, Grady KL, White-Williams C. Winter:145–154.

Type A behavior and social support among employed women. Vroege JA, Aaronson NK. Winter:169–173.

Victims of the Intifada: The psychosocial adjustment of the injured. Khamis V. Fall:93–101.

BOOK REVIEW

Coronary Heart Disease: A Behavioral Perspective. Smith TW, Leon AS. Reviewed by Miller T. Spring:12.
